🍲 gazpacho: introduction

Introducing Gazpacho

Next Video

📖 Notes

You may need to scrape a website once in a while. That means that we'll need a convenient tool for it. You could use tools like requests combined with beautiful soup but since you'll only be using a small subset of these libraries most of the time you may be able to make do with a simpler package: gazpacho.

In this series of videos we will be scraping a table from [the pypi website](#).

For this video you'll need to install the following dependency;

```
python —m pip install gazpacho
```

Made by people who want to remedy the skill anxiety. Tools and thoughts that might make your professional life more enjoyable.
